Morpheus Post- Treatment Care

- Immediately after treatment most patients with experience erythema(redness) for 1-3 days, however for more aggressive treatments this may last longer. Slight to moderate edema(swelling) and mild to moderate sunburn sensation are also common post treatment and may last 1-3 days. Skin may crust and peel for 2-7 days depending on treatment settings.
- Before discharge a topical ointment may be applied to the face, no bandages or wraps are necessary.
- During bathing treat the skin gently, avoid scrubbing or trauma to the treated area, no cleanser or only a gentle, non foaming cleanser(milky lotion cleanser) on treated area for 3 days post treatment.
- No use of anti-inflammatories(ibuprofen, aspirin, fish oils, ect) for 1 week post treatment
- Avoid sun exposure to reduce the chance of hyperpigmentation for 2-3 weeks
- No makeup for 3 days post treatment
- The use of a zinc oxide sun block SPF 30+ at all times after 72 hours and between treatments
- A series of 3 treatments 4 weeks apart usually is recommended
